

## Technical Tips for this Online Course

- The course menu is "restricted," meaning you must complete the lessons in order and may not skip ahead, but you can review any completed sections freely.
- Some sections will advance automatically, and some will require you to click the Next button. You will be told when you need to click Next. Each page must be completed before the Next button is available.
- If you need to take a break, bookmark the course in your browser (ctrl+D) so you can save its location. Then, close the course by using the Exit button. The course will remember where you left off and any text you have typed. When you return, launch the course by going to your bookmark and clicking the "Resume" button to continue where you left off.
- For the best experience, use a tablet or laptop/desktop computer screen for this course.

### **If you are using a mobile device, follow these tips for optimal learning on small screens:**

- On tablets and phones, this course is best viewed in portrait mode rather than landscape (tall instead of wide).
- For optimal viewing, rotate your device between horizontal and vertical to get the best view, depending on the screen's content.
- There are several screens where you will be asked to enter text. Instead of using the keyboard on a mobile device, use the microphone to record your answer. It's easy and fun!
- Avoid using other applications in the background, and be sure to close other browser tabs while taking the course.
- If you need to take a break, be sure to Exit the course and resume when you return. See the instructions above on how to do this.
- If your device's screen is set to auto-lock after a certain amount of time, consider disabling that feature to prevent interruptions while viewing the course.
- It is not uncommon for a media-rich course such as this one to drop the connection mid-course. If this happens, simply click Resume to pick up where you were and continue the course.
